

1. What are the approximate ages for Classes?

Any swimmer can enroll in any Class based on their ability to perform the listed skills. However, for our beginning Classes, the following could be a good starting place for your swimmer:

Class A: 6 months to 3 years old

Class B: Starting at 4 years old with the ability to be independent in the water

Class C: Starting at 5 years old or passing Aqua Tots or Class B

Class D: Starting at 6 years old or passing Aqua Tots or Class C

2. My swimmer passed Aqua Tots. What Class should they be enrolled in?

Take a look on the completion card from Aqua Tots. Compare the passed skills with the Class C and Class D.

- If there are skills that your swimmer still needs to master, sign them up for Class C.*
- If they passed all the skills with proficiency, you could sign them up for Class D.*
- If you are not sure, sign the up for Class C.*

There is parental discretion where you feel your swimmer will fit into Aqua Academy. You can contact Krystal at 920-832-3926 to discuss correct placement.

Note: Once classes begin, if instructors and/ or the Swim Lesson Manager do not feel that your child is in the correct class, conversations on correct placement will take place.

3. Class B, C, and D are all beginning swim skills. What is the difference between them?

Class B is the start of independent water skills for beginning swimmers. They should be able to work with instructors on swimming skills without the assistance of parents.

In Class C, swimmers will be developing skills without assistance from instructors. They will be learning how to use swimming equipment, like barbells and kickboards, to practice skills.

Class D will be learning and combining skills to start developing swimming strokes.

For a breakdown of all the skills swimmers need to be proficient at to enroll in a Class, please see the Appleton Parks and Recreation website.
